ABSTRAK

AKI (Angka Kematian Ibu) di Indonesia menunjukkan peningkatan yang signifikan yaitu 359 per 100.000 kelahiran hidup. Puskesmas PONED (Post Obstetry Neonatal Emergency Dasar) memiliki rawat inap, sarana yang memadai dan sesuai syarat pelayanan kesehatan untuk menurunkan AKI serta mendekatkan pelayanan kesehatan kepada masyarakat. Tujuan penelitian ini adalah mendeskripsikan syarat pelayanan Puskesmas PONED dalam pelayanan kesehatan Ibu.

Metode penelitian menggunakan deskriptif kuantitatif dengan pendekatan cross sectional. Instrumen penelitian menggunakan kuesioner yang menggunakan uji validitas, uji reliabilitas dan uji normalitas data. Kuesioner berisi lima syarat pelayanan kesehatan: (1) Pelayanan kesehatan yang tersedia dan berkesinambungan, (2) Pelayanan kesehatan yang wajar, (3) Pelayanan kesehatan yang mudah dicapai, (4) Pelayanan kesehatan yang mudah dijangkau dan (5) Pelayanan kesehatan yang bermutu.

Sampel penelitian berjumlah 52 responden adalah total dari semua populasi, Hasil menunjukkan bahwa syarat pertama Pelayanan kesehatan yang tersedia dan berkesinambungan berkategori cukup (62%) dan item pernyataan yang kurang tenaga medis yang siap saat keadaan darurat, Pelayanan kesehatan yang wajar berkategori cukup (56%) item yang kurang yaitu sikap petugas mau berkomunikasi dengan pasien, Syarat ketiga Pelayanan kesehatan yang mudah dicapai berkategori cukup (68%), item kurang Jarak antara rumah dengan Puskesmas PONED >2Km, Pelayanan kesehatan yang mudah dijangkau berkategori cukup (66%), item kurang Tarif persalinan di Puskesmas PONED sesuai standar kelima Pelayanan kesehatan yang bermutu dengan kategori cukup (64%) item kurang Ketersediaan tempat tidur yang memadai.

Puskesmas Bangetayu dapat meningkatkan ketersediaan sarana dan prasarana yang memadai, kemudahan akses untuk mencapai lokasi, penyediaan jaminan kesehatan bagi masyarakat kurang mampu dan mutu pelayanan guna memberikan layanan terbaik
